#### **DETAILED ACTION**

### Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- 2. Claims 1-4 are rejected under 35 U.S.C. 102(a) as being clearly anticipated by Ruf (5,850,048).

As recited in claim 1, Ruf discloses an audio signal processing apparatus capable of changing the tempo of an input audio signal, said apparatus comprising: magnification designating means (133,134) capable of designating a plurality of different magnifications; means capable of automatically detecting a BPM or a beat period of the input audio signal as discussed in column 2, lines 43-48, changing the BPM or the beat period in accordance with a magnification designated by the magnification designating means, changing the tempo of the audio signal in accordance with the changed BPM and the changed beat period as discussed in column 3, lines 1-16.

As recited in claim 2, Ruf discloses the audio signal processing apparatus, wherein manual designating means (130) is provided for designating any optional value serving as a BPM and a beat period.

Art Unit: 2837

As recited in claim 3, Ruf discloses the audio signal processing apparatus, wherein fine adjustment means is provided to effect a fine adjustment on a BPM and a beat period, as discussed in column 2, lines 43-48, wherein any direct adjustment can be made, and thereby effecting the same based on the direct adjustment.

As recited in claim 4, Ruf discloses the audio signal processing apparatus, wherein indicators (103) are provided to indicate a BPM and a beat period.

## Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 5 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ruf in view of Rothbart (4,733,593).

Ruf is discussed above. Ruf does not disclose a mixer for mixing a changed tempo signal with the input audio signal.

However, as recited in claims 5 and 6, Rothbart discloses an audio signal processing apparatus, wherein a mixer is provided and wherein mixing ratio adjusting means adjusts a mixing ratio such that an audio signal generated by changing the tempo of the audio signal may be mixed

Application/Control Number: 09/359,793

•

Art Unit: 2837

2837

with the input audio signal, thereby producing a newly formed audio signal as discussed in column

3, lines 18-21 and lines 27-32, and as discussed in column 6, line 33 through column 7, line 5.

It would have been obvious to one of ordinary skill in the art at the time the invention was

Page 4

made to utilize Rothbart with the apparatus Ruf, because Rothbart enhances Ruf by providing

means for mixing signals to thereby produce a new signal.

5. The prior art made of record and not relied upon is considered pertinent to applicant's

disclosure.

Yamada et al. (5,614,687) are cited as pertinent art, because the reference discloses an

apparatus for detecting BPM's, wherein the BPM for an input signal is automatically detected.
